

Arriva Passenger Services Pension Plan: Money Purchase Sections

Statement of Investment Principles

Scope of Statement

This Statement has been prepared in accordance with Section 35 of the Pensions Act 1995 (as amended by the Pensions Act 2004, and the Occupational Pension Schemes (Investment) Regulations 2005).

The assets of the Plan are held in trust by the Trustee. The Trustee will review this Statement and the Plan's investment strategy no later than three years after the effective date of this Statement; without delay after any significant change in investment policy; and whenever the Trustee deems that a review is needed for any other reason. The effective date of this statement is 30 September 2020.

The Trustee reviews the continuing suitability of the statement's policies on an annual basis in conjunction with the writing of the Plan's Implementation Statements.

Plan Overview

The Plan comprises the following money purchase sections:

- **Primary money purchase Sections**
 - The Kent and Sussex Defined Contribution Section;
 - The Arriva Money Purchase Scheme (AMPS) Defined Contribution Section;
- **Additional money purchase sections**
 - Additional Voluntary Contributions;
 - Former AMPS With Profits holders (with Scottish Widows);
 - Former AMPS With Profits holders (with Prudential);
 - Shires (CIF investment);
 - Category A, Midland Fox and Crosville Works (CIF investment);
 - Category A, Midland Fox and Crosville Works (Aberdeen investment); and
 - Scotland West (CIF investment).

Consultations Made

The Trustee is responsible for the investment strategy of the Plan and, where appropriate, has obtained written independent advice on the investment strategy for the Plan and on the preparation of this Statement. This advice was provided by Aon Solutions UK Limited who are authorised and regulated by the Financial Conduct Authority.

The day-to-day management of the Plan's assets has been delegated to investment managers who are authorised and regulated by the Financial Conduct Authority. A copy of this Statement will be provided to the investment managers appointed and is available to the members of the Plan on request and on publicly accessible websites including: <https://www.mypensionline.com/arrivadbscheme/library.aspx>

Effective decision making

The Trustee recognises that decisions should be taken only by persons or organisations with the skills, information and resources necessary to take them effectively. It also recognises that where it takes investment decisions, it must have sufficient expertise and appropriate training to be able to evaluate critically any advice received. The Trustee receives regular investment training from its investment consultant and investment managers in order to make informed decisions.

Objectives and Policy for securing objectives

The Trustee's primary objectives are:

- "Asset choice" – to ensure members have an appropriate choice of assets for investment; and
- "Return objective" – to enable members to benefit from investment in growth assets until they approach retirement, when they will be able to switch to matching assets which are more related to the purchasing cost of their income and cash in retirement.

The Trustee has taken into account members' circumstances, in particular the range of members' attitudes to risk, term to retirement and potential retirement choices.

The Trustee's investment strategy has been chosen to enable members to maximise the likelihood of achieving these objectives. Following due consideration, the Trustee is satisfied that these investment options meet the requirement of Regulation 4 of the Investment Regulations.

Arrangements with Investment Managers

The Trustee recognises that members have differing investment needs and that these may change during the course of members' working lives. The Trustee also recognises that members have different attitudes to risk, and also that different members may wish to target different forms of benefit at retirement.

The Trustee believes that members should be able to make their own investment decisions based on their individual circumstances. The Trustee regards its duty as making available a range of investment options sufficient to enable members to tailor their investment strategy to their own needs, allowing members to build their own bespoke diversified investment portfolio if they so wish.

The Trustee monitors the investment options made available to Plan members, including the default investment option. This considers the extent to which the investment strategy and decisions of the appointed investment managers are aligned with the Trustee's policies, as set out in this statement. This includes monitoring the extent to which investment managers:

- make decisions based on assessments about medium- to long-term financial performance of an issuer of debt or equity; and
- engage with issuers of debt or equity in order to improve their performance in the medium- to long-term.

The Trustee is supported in this monitoring activity by its advisers.

The Trustee receives reporting and verbal updates from its advisers on various items including the investment strategy, performance, and longer-term positioning of the strategy. The Trustee focusses on longer-term performance when considering the ongoing suitability of the investment strategy in relation to the Plan's objectives and assesses the investment managers over the long-term.

If and when a new investment manager is appointed, the Trustee endeavours to review any required governing documentation associated with the investment and consider the extent to which it aligns with the Trustee's policies. Where necessary, the Trustee will seek to express its expectations to the investment managers to try to achieve greater alignment.

The Trustee believes that having appropriate governing documentation, setting clear expectations to the investment managers (e.g. verbally or in writing at time of appointment), and regular monitoring of investment managers' performance and investment strategy, is in most cases sufficient to incentivise the managers to make decisions that align with the Trustee's policies and are based on assessments of medium- and long-term financial performance.

Where investment managers are considered to be making decisions that are not in line with the Trustee's policies, expectations, or the other considerations set out above, the Trustee will endeavour to first engage with the manager and in the event of a material misalignment, could ultimately replace the manager if deemed necessary.

There is typically no set duration for arrangements with investment managers, although the continued appointment for all managers will be reviewed periodically, and at least every three years.

The Trustee does not monitor the underlying investments made by the investment managers on its behalf against non-financial criteria.

Investment risk measurement and management

The Trustee recognises that members take the investment risk. The Trustee takes account of this in the selection and monitoring of investment managers and the choice of funds offered to members.

The Trustee monitors the risk arising through the selection or appointment of investment managers on regular basis via investment monitoring reports prepared by their professional advisers. For the two primary money purchase sections, this monitoring occurs quarterly. For the additional Money Purchase sections, including AVCs, this monitoring is carried out annually or in-line with regulatory requirements (where investment in the CIF occurs).

The Trustee has appointed Aon to alert it to any matters of material significance that might affect the ability of the investment manager to achieve its objectives.

The Trustee acknowledges that investment returns achieved outside the expected deviation may be an indication that the investment manager is taking a higher level of risk than indicated.

Choosing Investments

The investment options offered to members are deemed appropriate, given the nature of the membership. Day-to-day selection of stocks is delegated to the investment managers appointed by the Trustee. The Trustee takes professional advice when formally reviewing the investment managers or funds offered to members.

The Trustee recognises that the key source of financial risk in relation to meeting its objectives normally arises from the choice of funds offered to members and retains responsibility for the asset choice and (where lifestyle options exist) allocation pattern via an individual matrix and takes expert advice as required from its professional advisers. A full range of available asset classes will be considered on an ongoing basis. This will include consideration of so called 'alternative' asset classes.

Primary money purchase sections: Kent & Sussex DC Section and AMPS DC Section

For members who do not wish to make an active decision regarding the investment of their assets, a default investment option has been put in place following consideration of the Plan membership.

In setting the three lifestyles, the Trustee has reviewed the extent to which the return on investments (after deduction of any charges relating to those investments) is consistent with the objectives of the strategy, which is broadly to provide an appropriate risk/return profile given the needs of members.

The Trustee regularly reviews the appropriateness of the three lifestyles and may make changes from time to time. Members are advised accordingly of any changes.

The switching of assets between the different funds within each lifestyle is carried out monthly by the platform provider, at which point members' funds are rebalanced in line with the lifestyle matrix illustrated in the charts on the following pages.

Details of the three lifestyles are provided below.

Catch All Lifestyle (the default investment option)

The Catch All Lifestyle works on the principle that a member electing this option will, at the point of retirement, transfer the balance of their account to a specialist income drawdown arrangement.

- During the 'Growth' / 'Accumulation' phase, the Catch All Lifestyle aims to provide real growth (in excess of inflation) over the long term. The Catch All Lifestyle initially invests wholly in the LGIM All World Equity Fund until 10 years before a member's selected retirement age.
- During the 'Consolidation' phase, the Catch All Lifestyle aims to provide real growth and capital preservation through means of asset diversification. This is implemented by a gradual switch into the LGIM Multi Asset Fund.
- During the 'Transition' phase, the Catch All Lifestyle gradually introduces an allocation to the LGIM Cash Fund with a view that members will wish to access their 25% tax-free lump sum at retirement.
- At the point of a member's selected retirement age, the Catch All Lifestyle will be invested 75% in the LGIM Multi Asset Fund and 25% in the LGIM Cash Fund.

This structure is summarised below.

Chart 1: Catch All Lifestyle (default investment option)

Annuity Lifestyle

The Annuity Lifestyle works on the principle that a member electing this option will, at the point of retirement, take the maximum tax-free cash sum and use the rest of their account to purchase an annuity at retirement.

- During the 'Growth' / 'Accumulation' phase, the Annuity Lifestyle initially invests wholly in the LGIM All World Equity Fund until 10 years before a member's selected retirement age.
- During the 'Consolidation' phase, the Annuity Lifestyle aims to provide real growth and capital preservation through means of asset diversification. This is implemented by a gradual switch into the LGIM Multi Asset Fund until a member's selected retirement age.
- During the 'Transition' / "De-risking" phase, the Annuity Lifestyle aims to protect the value of each member's investments relative to movements in annuity prices. This is implemented by a gradual switch into the LGIM Pre Retirement Fund.
- Before retirement, the Annuity Lifestyle gradually introduces an allocation to the LGIM Cash Fund with a view that members will take tax-free cash lump sum at retirement.
- At the point of a member's selected retirement age, the Annuity Lifestyle will be invested 75% in the LGIM Pre Retirement Fund and 25% in the LGIM Cash Fund.

This structure is summarised below.

Chart 2: Annuity Lifestyle

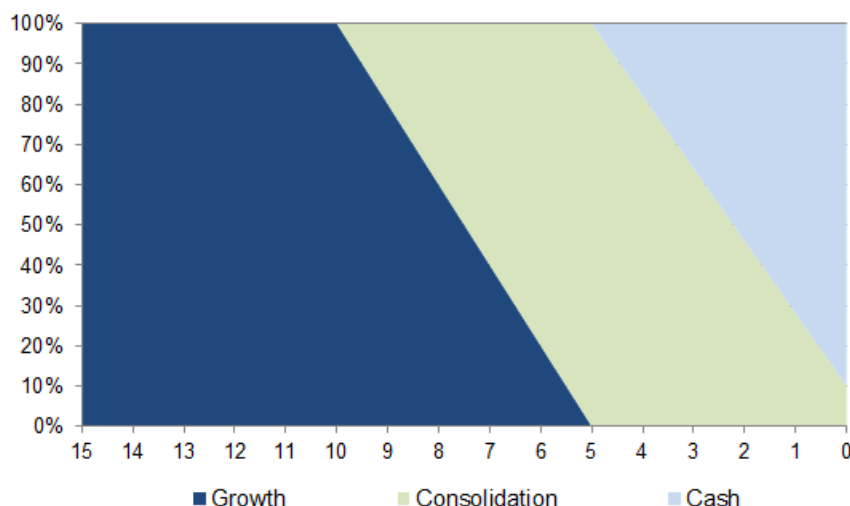

Cash Lifestyle

The Cash Lifestyle works on the principle that a member electing this option will take the whole of their account as a cash lump sum at retirement.

- During the 'Growth' / 'Accumulation' phase, the Cash Lifestyle aims to provide real growth (in excess of inflation) over the long term. The Cash Lifestyle initially invests wholly in the LGIM All World Equity Fund until 10 years before a member's selected retirement age.
- During the 'Consolidation' phase, the Cash Lifestyle aims to provide real growth and capital preservation through means of asset diversification. This is implemented by a gradual switch into the LGIM Multi Asset Fund.
- During the 'Transition' / "De-risking" phase, the Cash Lifestyle gradually switches towards an allocation of 90% in the LGIM Cash Fund and 10% in the LGIM Multi Asset Fund" at the point of retirement.
- The 10% allocation to non-cash assets at retirement allows a reasonable balance to be achieved between achieving positive returns (after fees) and mismatch / downside in risk.

This structure is summarised in the below.

Chart 3: Cash Lifestyle

Default investment option: Rationale

The Trustee selected the Catch All Lifestyle as the default investment option for the two primary DC sections, as set out above, for those members of the Plan who do not want to make a decision with regards their investments.

The lifestyle strategies, including the default investment option, have been constructed following analysis of the existing membership of the Plan. This analysis took into account factors such as age, projected fund values and term to retirement, to identify different types of member.

The design of the default investment option offered to members reflects this analysis and also taking into account the various options members will have regarding the way in which they draw their benefits in retirement.

The aim of the default investment option is to provide members with the potential for higher levels of growth during the accumulation of their retirement savings through exposure to equities, and then to gradually diversify their investments in the years approaching retirement, to reduce volatility and provide a broad base of assets from which members can choose the type of benefits they wish to take.

The outcomes of the default investment option and other Lifestyle strategies will be reviewed periodically with reference to the manner in which members take their benefits from the Plan. This periodic review will also take into account any significant changes in the demographic profile of the relevant members.

Additional Money Purchase Sections

The oversight exercised by the Trustee in respect of these sections meets the necessary regulatory requirements and is proportionate to the relatively small value that these arrangements represent as a proportion of any individual member's overall benefit entitlement.

Custody

Investment in pooled funds gives the Trustee rights to the cash value of the units rather than to the underlying assets. The underlying investment manager of each of the pooled funds is responsible for the appointment and monitoring of the custodian of the fund's assets.

Expected returns on assets

Over the long term the Trustee's expectations are:

- for units representing "growth" assets, to achieve a return which provides a real return above the increase in price inflation over the same period. The Trustee considers short-term volatility in equity price behaviour as acceptable, given the general expectation that over the long-term equities will outperform the other major asset classes;
- for units representing monetary assets (corporate bonds and gilts), to achieve a rate of return which is expected to be approximately in line with changes in the cost of providing fixed income annuities or a cash sum at retirement.

Returns achieved by the investment managers are assessed against performance benchmarks set by the Trustee in consultation with its advisers and investment managers.

Potential Risks

The Trustee recognises that members take the investment risk. The Trustee takes account of this in the selection and monitoring of the investment manager and the choice of funds offered to members. and has considered risk from a number of perspectives.

The investment options made available to members have been chosen with the aim of enabling members to control the following risks:

- **Inflation risk.** The risk that the level of investment return over members' working lives will not keep pace with inflation and will not, therefore, secure an adequate retirement benefit.
- **Volatility risk.** The risk of significant short-term fluctuations in the value of members' invested capital which some members may be concerned about.
- **Capital risk.** The risk of a significant fall in the value of members' invested capital as they approach retirement.
- **Conversion risk.** The risk that relative market movements in the years just prior to retirement lead to a substantial reduction in benefits secured.

A number of other risks have also been considered when deciding on the investment options to make available to members:

- **Default investment option risk.** The risk of the default investment option being unsuitable for the requirements of some members. The Trustee has provided additional lifestyle and individual fund options in addition to the default investment option and has communicated to members the need to review their own requirements and circumstances before making any investment decisions.
- **Investment Manager Risk.** The risk that the selected investment managers underperform their objectives. The Trustee regularly reviews each fund's investment performance and takes ongoing advice from the investment adviser on the ongoing suitability of the funds and investment managers. The Trustee focuses on providing passive options that avoid active management risk.
- **Diversification Risk.** The Trustee has chosen funds that are constructed from well diversified portfolios of assets to reduce the stock specific risk faced by the Plan.
- **Liquidity Risk.** Being forced to sell investments to pay benefits in unfavourable financial market conditions. The Trustee has invested in unitised pooled funds which are easily redeemable.
- **Geared or speculative investments using derivatives.** The Trustee has not invested in funds that are geared or make largely speculative use of derivatives.
- **Credit Risk.** The risk that one party to a financial instrument will cause a financial loss to the other party by failing to discharge an obligation. The credit risk the Plan is exposed to arises from holdings in the underlying funds.
- **Market Risk.** The Plan is subject to currency, interest rate and other price risk associated with the underlying investments. These risks can impact the valuations of the funds. The Trustee has selected a sufficient range of funds to be available to allow members to suitably diversify their investments to manage these risks. This is also considered when setting the lifestyle strategies. Further, the Trustee closely monitors the performance of the funds and receives formal reports from the investment adviser giving views on their continuing appropriateness, and that of the underlying investment managers.
- **The risk of fraud, poor advice or acts of negligence ("operational risk").** The Trustee has sought to minimise such risk by ensuring that all advisers and third-party service providers are suitably qualified and experienced, and that suitable liability and compensation clauses are included in all contracts for professional services received.

Due to the complex and interrelated nature of these risks, the Trustee considers these risks in a qualitative rather than quantitative manner as part of each formal strategy review. The Trustee's policy is to review the range of funds offered and the suitability of the default investment option periodically.

These risks are considered as part of each formal strategy review. In addition, the Trustee's measure risk in terms of the performance of the assets compared to the benchmarks on a regular basis as part of each quarterly reporting cycle.

Realisation of Investment / Liquidity

The Trustee recognises that there is a risk of holding assets that cannot easily be realised should the need arise. The majority of assets held on behalf of members are realisable at short notice (through the sale of units in pooled funds).

Responsible Investment

In setting the Plan's investment strategy, including the default investment option, the Trustee's primary concern is to act in the best financial interests of the Plan and its beneficiaries, seeking the best return that is consistent with a prudent and appropriate level of risk. This includes the risk that environmental, social and governance factors including climate change negatively impact the value of investments held if not understood and evaluated properly. The Trustee considers this risk by taking advice from their investment adviser when setting the Plan's investment strategy (including the different options available to members), when selecting managers and when monitoring their performance.

Stewardship – Voting & Engagement

The Trustee invests in pooled funds and as such have delegated responsibility for the selection, retention and realisation of investments to the Plan's investment managers in whose funds they invest.

The Trustee recognises the importance of its role as a steward of capital and the need to ensure the highest standards of governance and promotion of corporate responsibility in the underlying companies and assets in which the Plan invests, as this ultimately creates long-term financial value for the Plan and its beneficiaries.

As part of their delegated responsibilities, the Trustee expects the Plan's investment managers to:

- where appropriate, engage with investee companies with the aim to protect and enhance the value of assets; and
- exercise the Trustee's voting rights in relation to the Plan's assets.

The Trustee regularly reviews the continuing suitability of the appointed managers and takes advice from the investment adviser regarding any changes. Where appropriate, this advice includes stewardship matters and the exercise of voting rights by the appointed managers. If an incumbent manager is found to be falling short of the standards that the Trustee has set out in its Responsible Investment policy, the Trustee undertakes to engage with the manager and seek a more sustainable position (where possible) but may look to replace the manager.

The Trustee endeavours to review the stewardship activities of its investment managers on an annual basis, covering both engagement and voting actions. The Trustee will review the alignment of its policies to those of the Plan's investment managers and ensure the managers, or other third parties, use their influence as major institutional investors to carry out the Trustee's rights and duties as a responsible

shareholder and asset owner. This will include voting, along with – where relevant and appropriate – engaging with underlying investee companies and assets to promote good corporate governance, accountability, and positive change.

On an annual basis, the Trustee expects managers to provide aggregate voting information at a fund level and voting rationale for significant votes (defined as where votes were cast against management or where voting differed from the standard voting policy of the manager).

The Trustee will engage with its investment managers, as necessary, for more information to ensure that robust active ownership behaviours, reflective of its active ownership policies, are being actioned. From time to time, the Trustee will consider the methods by which, and the circumstances under which, it would monitor and engage with an issuer of debt or equity, an investment manager or another holder of debt or equity, and other stakeholders. The Trustee may engage on matters concerning an issuer of debt or equity, including their performance, strategy, risks, social and environmental impact and corporate governance, the capital structure, and management of actual or potential conflicts of interest.

This advice includes consideration of broader stewardship matters and the exercise of voting rights by the appointed managers.

Members' Views and Non-Financial Factors

On a reactive basis, the Trustee considers views from members and other stakeholders, including views in relation to social and environmental impact, or views with respect to non-financial matters.

In setting and implementing the Plan's investment strategy, the Trustee does not explicitly take into account the views of Plan members and beneficiaries in relation to ethical considerations, social and environmental impact, or present and future quality of life matters (defined as "non-financial factors").

The underlying funds that make up the default investment option, the alternative lifestyle options and other self-select funds should not apply personal ethical or moral judgements as the sole basis for an investment decision.

Alignment with wider corporate sustainability policies and practices

Although cognisant of the Employer's policies, the Trustee is not currently looking to integrate its own policies and practices with those of the Employer. This position will be considered on an annual basis.

Costs & Transparency

Adviser related costs

The Trustee's advisers are paid for advice received on the basis of the time spent on appropriate work. For significant areas of advice (for example large projects, such as a review of the lifestyle strategies), the Trustee may agree a project budget. These arrangements recognise the bespoke nature of the advice given, and that no investment decisions have been delegated to the adviser. These costs are not met by members and are not included in member borne costs.

Member borne costs

It is the Trustee's view that long term performance, net of fees, is the most important metric on which to evaluate its investment managers.

Investment managers are remunerated by the deduction of set percentages of assets under management. This is in-line with market practice and avoids a short-term approach to investment performance that may be the result of any performance-related fees. The Trustee therefore believes it is important to understand all the different costs and charges, which are paid by members (through a deduction from the unit price). These include:

- explicit charges, such as the annual management charge, and additional expenses that are disclosed by investment managers as part of the Total Expense Ratio ('TER');
- implicit charges, such as the portfolio turnover costs (transaction costs) borne within a fund. The Trustee defines portfolio turnover costs as the costs incurred in buying and selling underlying securities held within the fund's portfolio. These are incurred on an ongoing basis and are implicit within the performance of each fund.

The Trustee collects information on these member-borne costs and charges on an annual basis, where available, and sets these out in the Plan's annual Governance Statements which are made available to members in a publicly accessible location.

No specific ranges are set for acceptable costs and charges, particularly in relation to portfolio turnover costs. However, the Trustee expects its advisers to highlight if these costs and charges appear unreasonable when they are collected as part of the annual Governance Statement exercise.

In general, the Trustee believes that low cost passive funds offer good value for money, for members, and these should be used in a default investment option. However, it also believes that there can be opportunities for active managers to add value and accordingly may make available active funds either as part of the default investment option or on a self-select basis.

Appendix: Kent and Sussex Defined Contribution Section and AMPS Defined Contribution Section

The options available for Freestyle (or self-select) members are shown in the table below.

Asset Class	Fund
UK Equities	LGIM UK Equity Index Fund
Global Equities	LGIM All World Equity Index Fund
Multi Asset	LGIM Multi Asset Fund
Index-Linked Gilts	LGIM Index-Linked Gilt Index Fund
Pre-Retirement Fund	LGIM Pre-Retirement Fund
Cash	LGIM Cash Fund

The following describes the mandates given to the investment manager within each asset class of the Defined Contribution Section.

1. UK Equity Fund

Manager/Fund	Performance Measurement Benchmark	Benchmark Outperformance Target	Expected Tracking Error
LGIM UK Equity Index Fund	FTSE All-Share Index	To track the benchmark	+/- 0.25% p.a. for two years in three

2. Global Equity Fund

Manager/Fund	Performance Measurement Benchmark	Benchmark Outperformance Target	Expected Tracking Error
LGIM All World Equity Index Fund	FTSE All-World Index	To track the benchmark	+/- 0.50% p.a. for two years in three

3. Multi-Asset

Manager/Fund	Performance Measurement Benchmark	Benchmark Outperformance Target	Expected Tracking Error
LGIM Multi Asset Fund	Not applicable, compared to the ABI Mixed Investment 40-85% Shares Sector	Provide long-term investment growth through exposure to a diversified range of asset classes, excluding physical property	Not applicable

4. Index-Linked Gilts

Manager/Fund	Performance Measurement Benchmark	Benchmark Outperformance Target	Expected Tracking Error
LGIM Index-Linked Gilt Index Fund	FTSE Actuaries UK Index-Linked Gilts All Stocks Index	To track the benchmark	+/- 0.25% p.a. for two years in three

5. Pre-Retirement Fund

Manager/Fund	Performance Measurement Benchmark	Benchmark Outperformance Target	Expected Tracking Error
LGIM Pre-Retirement Fund	Composite of gilts and corporate bond funds.	To track the benchmark	Not applicable

6. Cash Fund

Manager/Fund	Performance Measurement Benchmark	Benchmark Outperformance Target	Expected Tracking Error
LGIM Cash Fund	7 Day LIBID	To track the benchmark	Not applicable

7. Summary of Investment Management Fee Arrangements

Manager/Fund	Fund	Fee Scale
LGIM	UK Equity Index Fund	0.085% p.a.
LGIM	All World Equity Index Fund	0.180% p.a.
LGIM	Multi Asset Fund	0.230% p.a.
LGIM	Index-Linked Gilt Index Fund	0.100% p.a.
LGIM	Pre-Retirement Fund	0.150% p.a.
LGIM	Cash Fund	0.110% p.a.
